 - Business Systems Specialist
- Software Developer – System100™
- Author of System Busters: How to Stop Them In Your Business
- Recipient - InterTech Technology Award

Philip Beyer is founder/president of Ebiz Products and Beyer Printing Inc. in Nashville, Tennessee, and developer of the award-winning* *System100™* business process management solution. His popular book *System Busters: How to Stop Them in Your Business* has become a much-used desk item for serious business owners and managers who seek to embrace lean and sustainable practices for continuous improvement in their companies.

Beyer's systems have helped many companies find their way back from disorder and wasted profits, and forward toward success. His passion is to see businesses grow and thrive with a sustainable culture of order and solid teamwork. His solution: *"It's so simple I'm amazed every company and organization on the planet doesn't know it as Business 101. Great systems make all the difference between guesswork and precision; unnecessary loss or profit!"*

Originally from Baton Rouge, Louisiana, Beyer established his commercial printing company in Nashville in 1988. Five years later his frustration with company chaos, recurring errors, high waste ratios, and lost revenues prompted an all-out search for solutions to bring order to his business. He discovered that many business owner/managers accept chaos in their business as "normal." However, Beyer was determined to find a solution that would allow him to spend his company's hard earned dollars on maximum efficiency.

Beyer poured through business books and articles by the best known experts, spoke with numerous business owners and managers, and scoured the Internet for answers—finding only pieces of "an incomplete circle." There were tons of theories about how to bring sustainable order to a business, but no easy-to-understand, step-by-step applications. Unwilling to give up, Beyer committed himself to what became a dozen year journey to total systemization for his company. Many other business owners and managers—all types and sizes of businesses—now use Beyer's solutions to bring maximum order to their own companies.

Philip Beyer now speaks for various businesses, universities, and conferences around the country. His three sons—Paul, Barton and Brandon—are all involved in the family businesses, and he and his wife Susan live on a small farm near Nashville, Tennessee.

INVITE Philip Beyer to speak for your next event. Contact Susan Beyer at (615) 425-2652 - toll free 1-888-496-8180, or email: susan@ebizproducts.com.
